Hello. I started to write this email on Friday AM, and apparently never finished it. I spoke with my colleague, Elizabeth about the program. We agree that your full-year certification program appears to provide a very good foundation in assessment.

Therefore, we encourage graduates to list the Board of Forensic Evaluator's course on their User Acceptance forms, along with all other appropriate degrees, licenses, and certifications when making a purchase from Pearson. Given what you have presented and told us about your program and trainees, we don't foresee any difficulties in graduates qualifying for C-level purchases. However, as I mentioned previously, we cannot *guarantee* acceptance, as all decisions are made based on an individual's overall level of training and experience.

Please inform your graduates that they should list the program as part of their assessment training experience when they complete the user acceptance form as part of the ordering process. We will be adding your program to our internal knowledge base so that sales support specialists may locate details to support a C-level purchase.

Please don't hesitate to contact me with any additional questions.

Best,

Amy
